I have serious concerns about the effects of the Willow Route on wildlife and fisheries habitat. Construction along that route could negatively impact the Little Susitna River Recreation corridor and the Willow Creek State Recreation Area, and affect lands in close proximity to the Susitna Flats State Game Refuge. It would result in a transportation corridor in an area that is currently undeveloped and is best suited as wild land. I prefer a shorter route which would have a smaller overall footprint such as the Big Lake corridor.
